

GENERAL TECHNICAL DATA

dimensions: - width: 11 1/8"
 - depth: 9 15/16"
 - height: 59 3/16"

weight: - 77 lb

bin capacity: - 3,3 gal

dispenser capacity: - 7.9252E-5 gal

materials: - steel: stainless or carbon

DESCRIPTION

Hand disinfection stations are an increasingly common element of small architecture enabling contact-free hand disinfection. They are a great solution for maintaining hygiene in public places such as: urban spaces, hospitals, clinics, train stations, shopping centres and shops.

The construction of the whole station is made of 2 mm thick steel sheet. The product is manufactured in carbon steel (ASTM A36), galvanized and powder-coated according to RAL palette with a stainless steel dispenser or entirely in ground stainless steel (AISI 304SS). The station is equipped with a galvanized steel litter bin with a capacity of 3,3 US gallons.

The station is equipped with:

- non-contact dispenser for disinfectant liquid
- round dispenser for wipes or nitrile gloves packed in boxes
- litter bin for used gloves/tissues

Refilling the dispenser, changing wipes and gloves and emptying the bin are easy.

0,26 gal of liquid is sufficient for approx. 3300 doses of disinfectant (one dose is approx. 7.9252E-5 gal). The station is equipped with 6 AA batteries. The batteries will last for approx. 2 weeks with frequent use.

In the rear part of the station is equipped with a lockable door for easy access to the various components. In addition, the upper part of the station has a hinged flap for easy refilling. The station is permanently mounted to the floor with wall plugs and screws.
