

## GENERAL TECHNICAL DATA

**dimensions:** - width: 28 cm  
- depth: 25 cm  
- height: 150 cm

**weight:** - 35 kg

**bin capacity:** - 12,5 L

**dispenser capacity:** - 1 L

**materials:** - carbon steel with stainless steel components  
or entirely in stainless steel

## DESCRIPTION

Hand disinfection stations are an increasingly common element of small architecture enabling contact-free hand disinfection. They are a great solution for maintaining hygiene in public places such as: urban spaces, hospitals, clinics, train stations, shopping centres and shops.

The construction of the whole station is made of 2 mm thick steel sheet. The product is manufactured in carbon steel (S235JR), galvanised and powder-coated according to RAL palette with a stainless steel dispenser or entirely in ground stainless steel (1.4301). The station is equipped with a galvanised steel basket with a capacity of 12.5 L.

The station is equipped with:

- non-contact dispenser for disinfectant liquid
- round dispenser for wipes or nitrile gloves packed in boxes
- litter bin for used gloves/tissues

Refilling the dispenser, changing wipes and gloves and emptying the basket are easy.

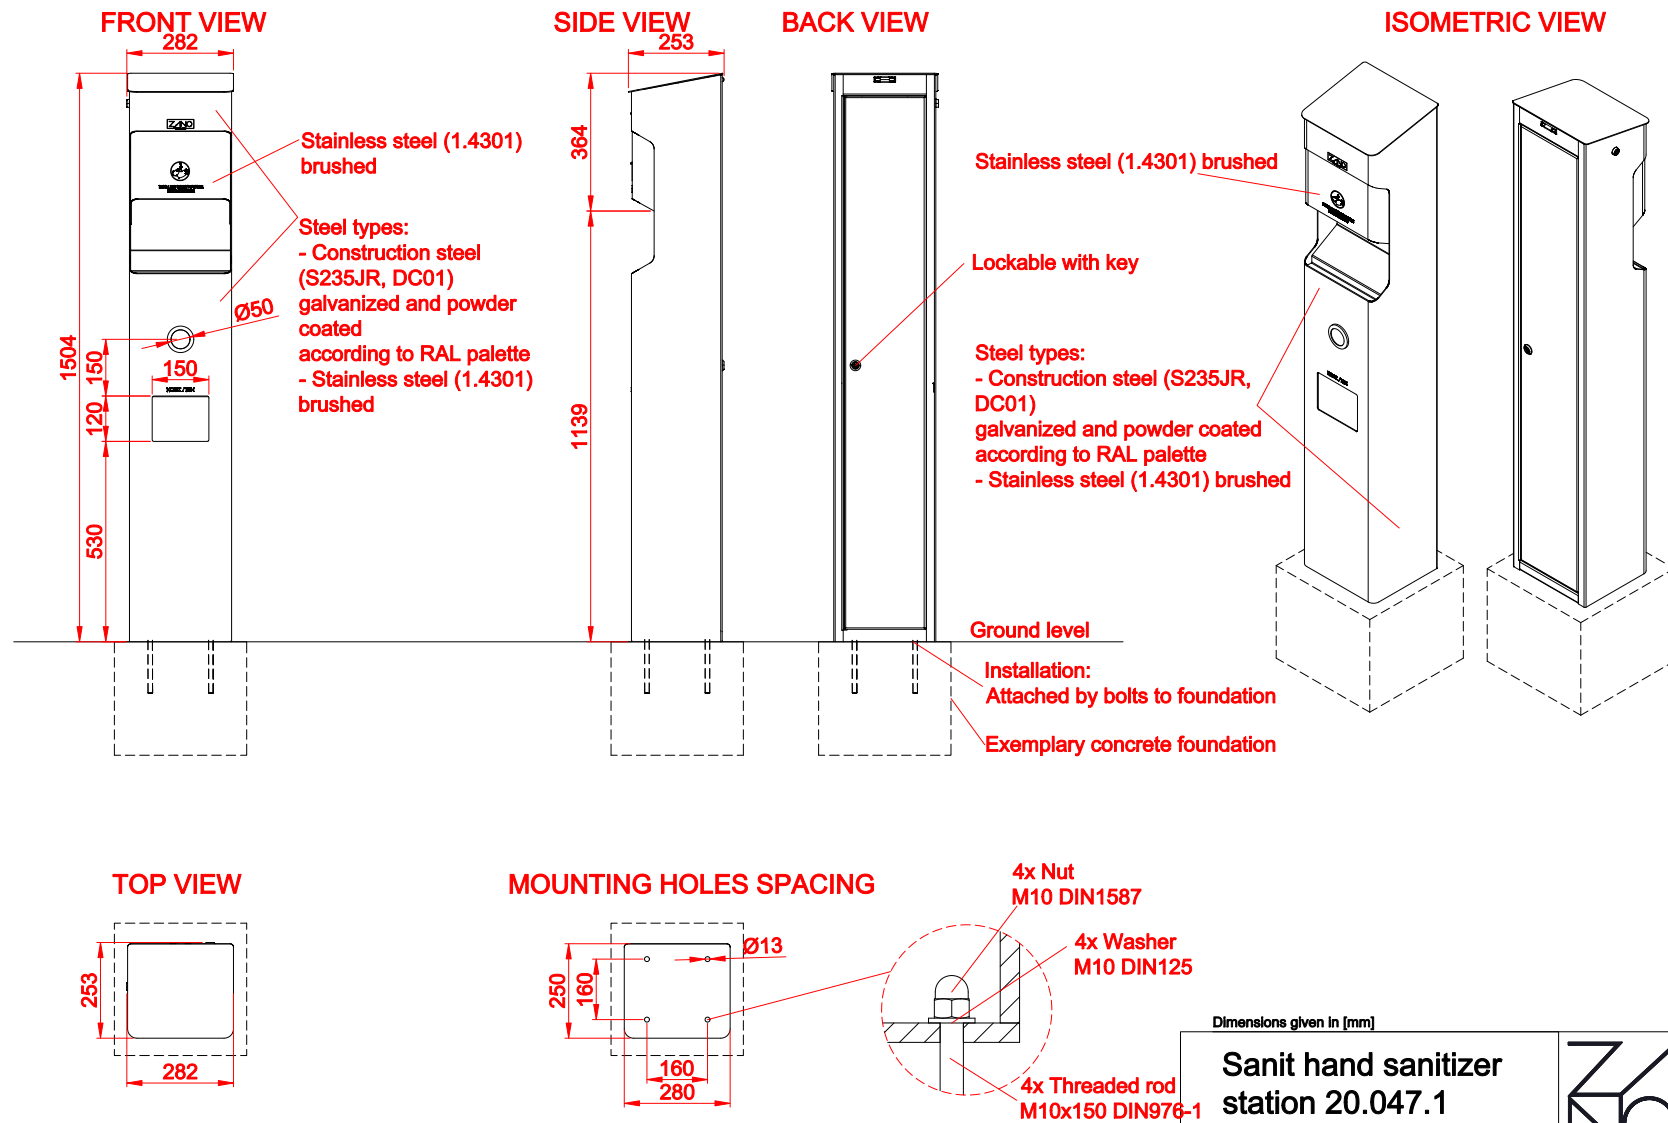

1 litre of liquid is sufficient for approx. 3300 doses of disinfectant (one dose is approx. 0.3 ml). The station is equipped with 6 AA batteries. The batteries will last for approx. 2 weeks with frequent use.

In the rear part of the station is equipped with a lockable door for easy access to the various components. In addition, the upper part of the station has a hinged flap for easy refilling. The station is permanently mounted to the floor with wall plugs and screws.

product: hand sanitizer station
